

Winter is coming to an end, snow
starts to melt, and almond trees
bloom.
It is springtime!

The weather is a little crazy: it is sunny,
it rains, sometimes it even hails ... and
then a *rainbow* appears in the sky.
Can you count how many colors it has?

The sun rises earlier and sets a little later. It gets warmer and warmer. What *time* do you go to school?
What time do you get off?
