

# Garlands, stockings and hats

Garlands made  
of leaves...,

... stars...

... and flowers.

You can see  
how vain the  
fairies are!

From plain, striped  
and spotted to  
flowers... they  
have many styles  
of stockings.

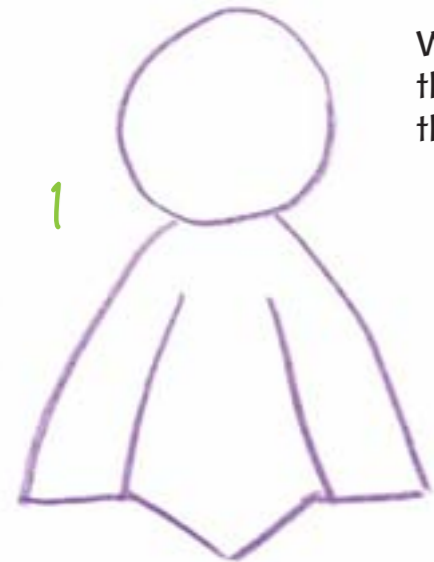

Observe: How did they make these hats?  
Now look closely at the flower and fruit  
shapes and draw a different one.

# Fairy Ocladia

1

We draw a circle to make the head and start drawing the dress.

2

We mark the places where the hat, neck and dress will go.

3

We improve the forms.

4

We draw the wings.

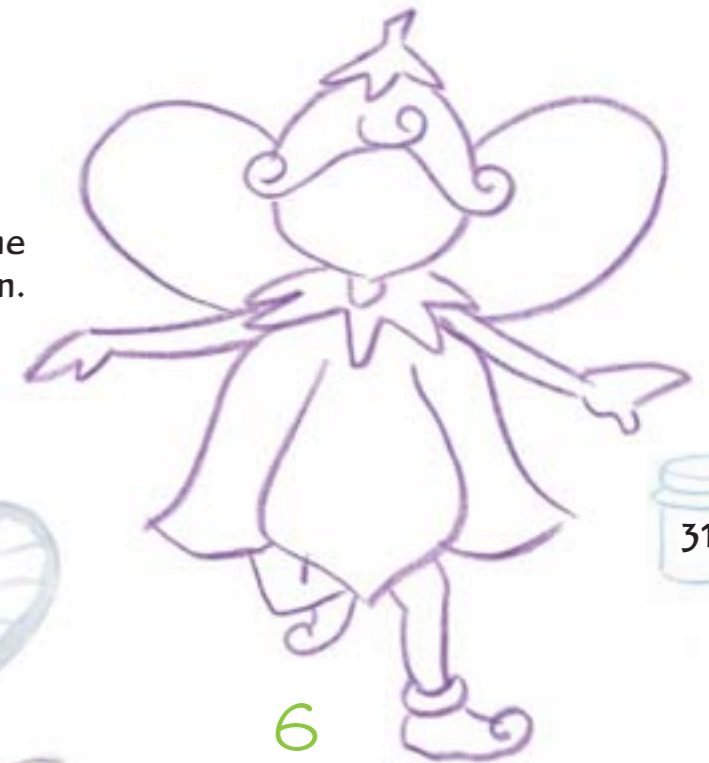

5

We mark the places where the arms and legs will go.

We add volume to them.

6

We finish off the detail and paint her!

7

Ocladia is very hard working; she always helps her friends.

As you already know, the fairies are very good friends with the stars and love the nighttime, especially Fairy Picarol.

## A starry night

Why don't you draw a sky full of stars?

33

You should draw several stars on a blue background. The smallest ones are different sized little balls that will provide you with a sensation of distance. You can make them with white tempera paint. If you paint them with watercolor before the blue color has dried, throw some grains of salt onto them and don't touch them until it has dried completely.
