

# Travelling in space

Have you ever noticed how big the world is? If you could see it from a spaceship, it would look like a huge ball floating in space. And this is where we live: a planet full of animals, plants... and boys and girls like you. But we are so small you wouldn't see us from out there!

Would you like to travel around the world to see how boys and girls live from one end to the other? Imagine living in the desert, in the jungle, in an island, in a big city... There are so many different places!

# What a lot of people!

There are millions and millions of people in the world, but among so many people, each one of us is different and unique.

The shape of your nose is different, and so are your eyes, the color of your hair, your skin, your height... Can you think of other aspects?

# A changing planet

The earth is so big that places in it are quite different one from the others. There are very high mountains, jungles, deserts, rivers and huge oceans. People in those places have learned to live with as much comfort as they can possibly have.

Everybody has their own habits and ways of dressing, speaking... It's a changing planet. What do you like best about the place where you live?
